

## **CARBYNE ATTRACTS FORMER GOVERNMENT AND PUBLIC SAFETY OFFICIALS, EXPANDS ADVISORY BOARD**

*Industry Executives to Lend Expertise for Next Generation 9-1-1 Technology Company's Accelerated Growth*

**New York – June 10, 2020** – [Carbyne](#), the leading innovation technology company in public safety, today announces significant additions to its advisory board, which will lend expertise to further reshape public safety and close the gaps that exist nationwide today. This group of recognized leaders across multiple sectors each brings comprehensive knowledge and expertise from government, public safety, and security.

Joining Carbyne's advisory board, include:

- Secretary Kirstjen Nielsen – Former Secretary of Homeland Security to the USA Government
- R. David Paulison – Former Director Federal Emergency Management Agency
- Ed Davis – Former Police Commissioner of the Boston Police
- Kevin Brock – Former Assistant Director for Intelligence, FBI
- Jim McDonnell – Former Sheriff of Los Angeles County, California

“Our state-of-the-art technology is transforming the way emergency call centers are interacting with their communities. We are thrilled to have attracted the interest of such well respected public safety experts to continue to refine our and better meet citizens' needs,” said Amir Elichai, CEO of Carbyne. “It's imperative to have different perspectives from the community and government, which is why we continue to build a strong, all-encompassing advisory board to further expand our company's offerings.”

“It's a pleasure to join the Carbyne team to help ensure that our nation's first responders and the operators of critical infrastructure have the tools and information they need to effectively respond to any crisis,” said Kirstjen Nielsen, former U.S. Secretary of Homeland Security. “Carbyne understands both risks and operational environments and tailors its solutions to meet the unique needs of its customers.”

Carbyne continues to attract renowned experts within their respected fields and at a time when safety is of the utmost importance. Carbyne's innovative technology proved to be essential for 911 call centers during the recent pandemic and its use can be implemented on a global scale for added support to communities.

“I'm thrilled to be part of such a distinguished team at Carbyne. Public Safety leadership needs valid data now, more than ever. Carbyne provides real time information for situational awareness that keeps the public safe. It is a vital tool,” notes Ed Davis, former Police Commissioner of the Boston Police.
